# End-of-Life Notification
## CLO-10 Link Optimizer DoubleTalk® Carrier-in-Carrier® Bandwidth Compression

We are committed to providing our valued customers with cost-effective products that meet the high-quality standards demanded by our community. There are occasions when we are no longer able to manufacture products due to various reasons. Our goal is to inform our customers of such issues and provide alternative solutions.

### End of Life Reason:
Due to parts shortages and the availability of key components, we are announcing an end of life of our CLO-10 Link Optimizer DoubleTalk Carrier-in-Carrier Bandwidth Compression platform.

### Last Time Buy Deadline:
The CLO-10 product was initially introduced in early 2006 and has been in a status of "build to order" for the past 5 years due to declining demand. We have recently been informed by our supplier of availability issues with key components and excess inventory of these key components are not available on the secondary broker market. For these reasons, the product is being moved to end-of-life as of this notification.

### Support:
We will continue to support repairs on End-of-Life (EOL) products as long as component/material obsolescence prevents us from doing so.

### Products Impacted and Best Fit Replacements:

| Last Time Buy Product | Best Fit Replacement Product | Best Fit Availability |
|---|---|---|
| CLO-10 | CDM-760 with Carrier-in-Carrier | Now |
| | CDM-625A with Carrier-in-Carrier | Now |
| | CDM-570A with Carrier-in-Carrier | Now |
| | SLM-5650B/C with Carrier-in-Carrier | Now |
| | DMD2050E with Carrier-in-Carrier | Now |
| | H-Plus with Carrier-in-Carrier | Now |

### Compatibility:
Products listed as the best fit replacement products are Carrier-in-Carrier enabled modems that have similar technology embedded into the modem directly. A stand-alone Carrier-in-Carrier cancellation device is no longer available.

### Further Questions:
If you have further questions or require more information, please contact your sales representative.
